

MIND GAP

a bridge between digital migrants and digital natives

The project has been approved under Erasmus + in Key Action 2 - Strategic Partnerships and its main purpose is to bridge the gap between those who are familiar with modern technology and those who feel socially excluded due to their lack of familiarity. The project is coordinated by Asociación La Bien Pagá Espacio Escénico from Spain.

R1: Theoretical and Methodological Framework for Contemporary Digital Skills for Adults (LBP)

R3: E- learning platform including digital-ed modules for the contemporary digital skills for digital migrants (INFODEF)

R2: Training Curriculum for digital migrants (GOI)

R4: Webinars / Instructional Videos as maps directly for digital migrants in virtual world (AKETH)

2nd Transnational Project Meeting

The second transnational project meeting was held on 28/6/2022 in Bastia, France. Some of the partners participated to the meeting via Skype.

In the meeting there was a detailed presentation, discussion and determination of the learning units among partners. The next steps of the project were discussed and an overview of the dissemination plan, activities, administrative and financial issues, was presented.

Specifically, the following activities took place:

- Presentation of the Theoretical and Methodological Framework for Contemporary Digital Skills for Adults
- Overview of analysis of theoretical and methodological framework to define learning modules for the curriculum
- Review of the technical implementation of the platform and instructional guide for the development of the training modules
- Presentation of the work plan for the practical guideline for overcoming the challenges in adult learning
- National online surveys to define themes and contents of the webinars and instructional videos (instructions and implementation)
