MIND THE GAP

a bridge between digital migrants and digital natives

E- learning platform
including digital-ed modules for the contemporary digital skills for digital migrants

aims to provide a multi-lingual e-learning platform for adult trainers in the teaching of digital migrants to guide in concrete ICT skills to be used in daily life. The primary focus of the platform is offering learning contents in digital-ed modules through a digital environment. The contents of the modules aim to cover important aspects of the "digital life" in terms of self-development, social and financial interaction, creating and managing electronic identity (eID) etc. A practical guide to overcome the challenges in adult learning compliments the e-Learning contents.
