

MIND GAP

a bridge between digital migrants and digital natives

The project has been approved under Erasmus + in Key Action 2 - Strategic Partnerships and its main purpose is to bridge the gap between those who are familiar with modern technology and those who feel socially excluded due to their lack of familiarity. The project is coordinated by Asociación La Bien Pagá Espacio Escénico from Spain.

R1: Theoretical and Methodological Framework for Contemporary Digital Skills for Adults (LBP)

R3: E-learning platform including digital-ed modules for the contemporary digital skills for digital migrants (INFODEF)

R2: Training Curriculum for digital migrants (GOI)

R4: Webinars / Instructional Videos as maps directly for digital migrants in virtual world (AKETH)

Training Activity & Piloting

The Training Activity of the "MIND THE GAP" was held in Istanbul, Turkiye on 16-17-18/05/2023. Project Result 3 "E-learning platform including digital-ed modules for the contemporary digital skills for digital migrants" and Project Result 4 "Webinars / Instructional Videos as maps directly for digital migrants in virtual world" was presented.

In July, we conducted a piloting test for our e-learning platform. The results were overwhelmingly positive, confirming that our user-friendly interface and instructional videos/webinars empower older learners to embrace digital education with confidence.
